

On March 10, 2026 the Arizona City Fire District Board of Directors voted to continue the vision of community service and life safety by announcing that the previous Arizona City Fire District has evolved into the Pinal County Fire and Medical Authority (PCFMA).

For decades, the Arizona City Fire District (AZCFD) has been a trusted community partner. We are a guardian of fire and life safety, dedicated to protecting lives, property in the community they serve. With a dedicated vision on community service, fire prevention, emergency response and public education. AZCFD continues to stand as a pillar of exceptional community service and support when it matters most.

The Pinal County Fire and Medical Authority (PCFMA) will now expand its fire and life safety services to not only the residents of Arizona City, but additional areas within Pinal County that currently have no fire and life safety services. Residents of Arizona City will see no increase in service cost and will receive the increased benefits of the Pinal County Fire and Medical Authority (PCFMA).

The Pinal County Fire and Medical Authority (PCFMA) will continue to focus on community service through excellence. The existing organization welcomes the change and looks forward to increasing our service district. We proudly serve the changing needs of our communities by providing exceptional fire, emergency and support services.

We will continue our commitment to preserving the quality of life in Pinal County.
